PROFILE SUMMARY

Frontend Developer with 2.5+ years of experience building fast, responsive apps using React, Next.js, JavaScript, HTML, and CSS. Skilled in UI/UX implementation, performance optimization, and modern tools like Redux, Tailwind, and Git. Focused on clean code, scalability, and delivering great user experiences.

PROJECTS

MANIMATIC

- Developed a natural language-to-animation platform that converts user prompts into Manim code using Gemini
- Automated video rendering and deployed a Next.js frontend for seamless user interaction

AI TUTOR

- Built a multi-agent tutoring platform featuring subject-specific agents (Math, Physics, History, Chemistry) powered by the Gemini API.
- Developed a modular agent-tool framework and a dynamic React + Next.js frontend enabling real-time, context-aware question-answer interactions.

NEWS AGGREGATOR

- This is a personal project showcasing a fully functional news application that fetches and displays the latest news articles using the News API.

INVOICE APP

- This project is a fully functional invoice management application designed to simplify the process of creating, managing, and deleting invoices.
